

Applicability

Applicable to customers whose premises are regularly supplied, in whole or in part, with electric energy from a non-utility source of electrical power supply (100 kilowatts or less); or to customers who at times receive electrical power supply from a Qualifying Facility or from a Public Exempt Generator licensed under Federal law. The Reactive Power Service Schedule applies where the use of the non-utility electrical power supply is not of a usual, regular or continuous character supplied by the District, and where the customer uses reactive power for the operation of the non-utility power source.

Character of Service

Same as character described in applicable regular service Rate Schedule.

Territory Served

The entire area within the Modesto Irrigation District electric service boundary or any other area served by Modesto Irrigation District pursuant to the laws of the State of California and the District's Electric Service Rules.

Monthly Rates

**Per Meter/Per Month
or Per District Estimate**

Customer charge or portion thereof None

Reactive Power Service Charge

Per KVAR of maximum reactive demand from meter, testing or estimate\$1.43

Special Provisions

1. Reactive Power Service consumed shall be deducted from Kilovolt Ampere Reactive (KVAR) consumption charged under Special Provision "Adjustment for Power Factor" of the applicable regular service Rate Schedule.
2. This service is mandatory for non-utility generation taking KVARs from the District and shall be required until such time as the following two conditions are both met to the satisfaction of the District:
 - 2.1 The customer is no longer taking KVARs from the District.
 - 2.2 The customer can demonstrate, to the satisfaction of the District, that it will not and cannot take KVARs from the District in the future.
3. This Service shall not be available except pursuant to a Service Designation and Parallel Operation Agreement with District.
4. Non-utility generation five (5) kW or less is exempt from this Rate Schedule.
